

Remembering Moura No.2

An address by the Chairperson

7 August 2020

The Board of Inquiry wishes to acknowledge that today is the 26th Anniversary of the Moura No. 2 Mine disaster in which 11 lives were lost and the lives of many more destructively impacted.

That this Anniversary falls within a period of public hearings of this Inquiry, underscores the collective need and responsibility we, who are concerned in this Inquiry, have in recommending meaningful improvement in safety for coal miners.
